# Email Archive

Simple, Fast, Reliable

Email Archive saves and preserves copies of all sent and received messages
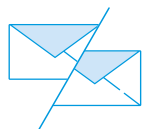

Messages are automatically sorted into Received and Sent and organised by year. Through a dedicated, simple and intuitive web interface, all archived messages can be searched, consulted and exported.

## Email Archive is integrated in the Control Panel

The APIs integrations with the Control Panel allow to easily and immediately activate Email Archive, is possible to set up a complete corporate email archiving system in just a few steps.

HOW DOES EMAIL ARCHIVE WORK?

Duplicate
The software automatically makes copies of all sent and received messages.

Archived
The software system stores and preserves messages with no space limitation for 10 years.

Indexed
The messages are indexed for fast and accurate searching from web and mobile.

Cloud
Email Archive is a fully cloud-based archiving service, with no space limits and no software or plugins to install.

Import
Email Archive includes an automatic function for importing email messages already present in users' mailboxes.

Legal Value
Email Archive is also a useful tool in the event of legal disputes, thanks to the possibility of electing delegated users (auditors) to view archived messages.
